**Subject:** FMT Ag AMR Workshop- Agenda and meeting updates  
**Attachments:** ATT00001.txt; AMR Draft agenda\_from PC meeting 2 - v8 near final.docx

Hello all,

Thank you for your ongoing work to support this workshop. We have nearly finalized the agenda (attached)- please let us know if there are any concerns with this version. **We are still seeking moderators for some of the sessions. We welcome you to volunteer yourselves for any sessions of interest, or recommend others.** Please reach out to me, Julie, or Justin to volunteer or offer suggestions.

During the Monday, May 16 meeting, we would like to discuss options for the hybrid meeting on June 27. One of the early ideas for the workshop was to hold a "scenario exercise" in which attendees are presented with an AMR scenario, and are then broken into groups to discuss response from different perspectives. With further discussion, we are now interested in presenting the scenario at the beginning of the day, and tying in each presentation to the scenario to give an example of how surveillance, stewardship, management, etc. might be implemented in a given situation. Speakers will still present on their given topic, but will be asked to make some connection to the specific scenario. This will aim to be a future-facing exercise, addressing the anticipated biggest challenges in AMR. We would love to hear your thoughts on this idea, and if favorable, your suggestions for the kind of scenario to present. We could either work to develop one, or modify an existing scenario for our purposes.

This Monday's meeting will focus on confirming the final draft of the agenda and discussing scenario possibilities for June 27. Due to a scheduling conflict, this week's meeting will be held from **12:30-1 EST**. We look forward to a productive conversation. Please reach out in the meantime with any questions or comments.

Best,

Liz Ashby
